Exam results

EBA1180 Mathematics for Data Science, 24/05/2023

Statistics

Share A-B	39.5%
Share F	23.7%
Average score	56.0% (D)

Comments

The exam results were mixed, with more students getting the grade A or B (39.5%), but there are still quite a few students getting the grade F (23.7%). All in all, the results are considerably better than last year. The grade distribution is shown to the right, and the grading scale is shown below to the right. The exam last year was more difficult, and the marking scale has been a adjusted accordingly.
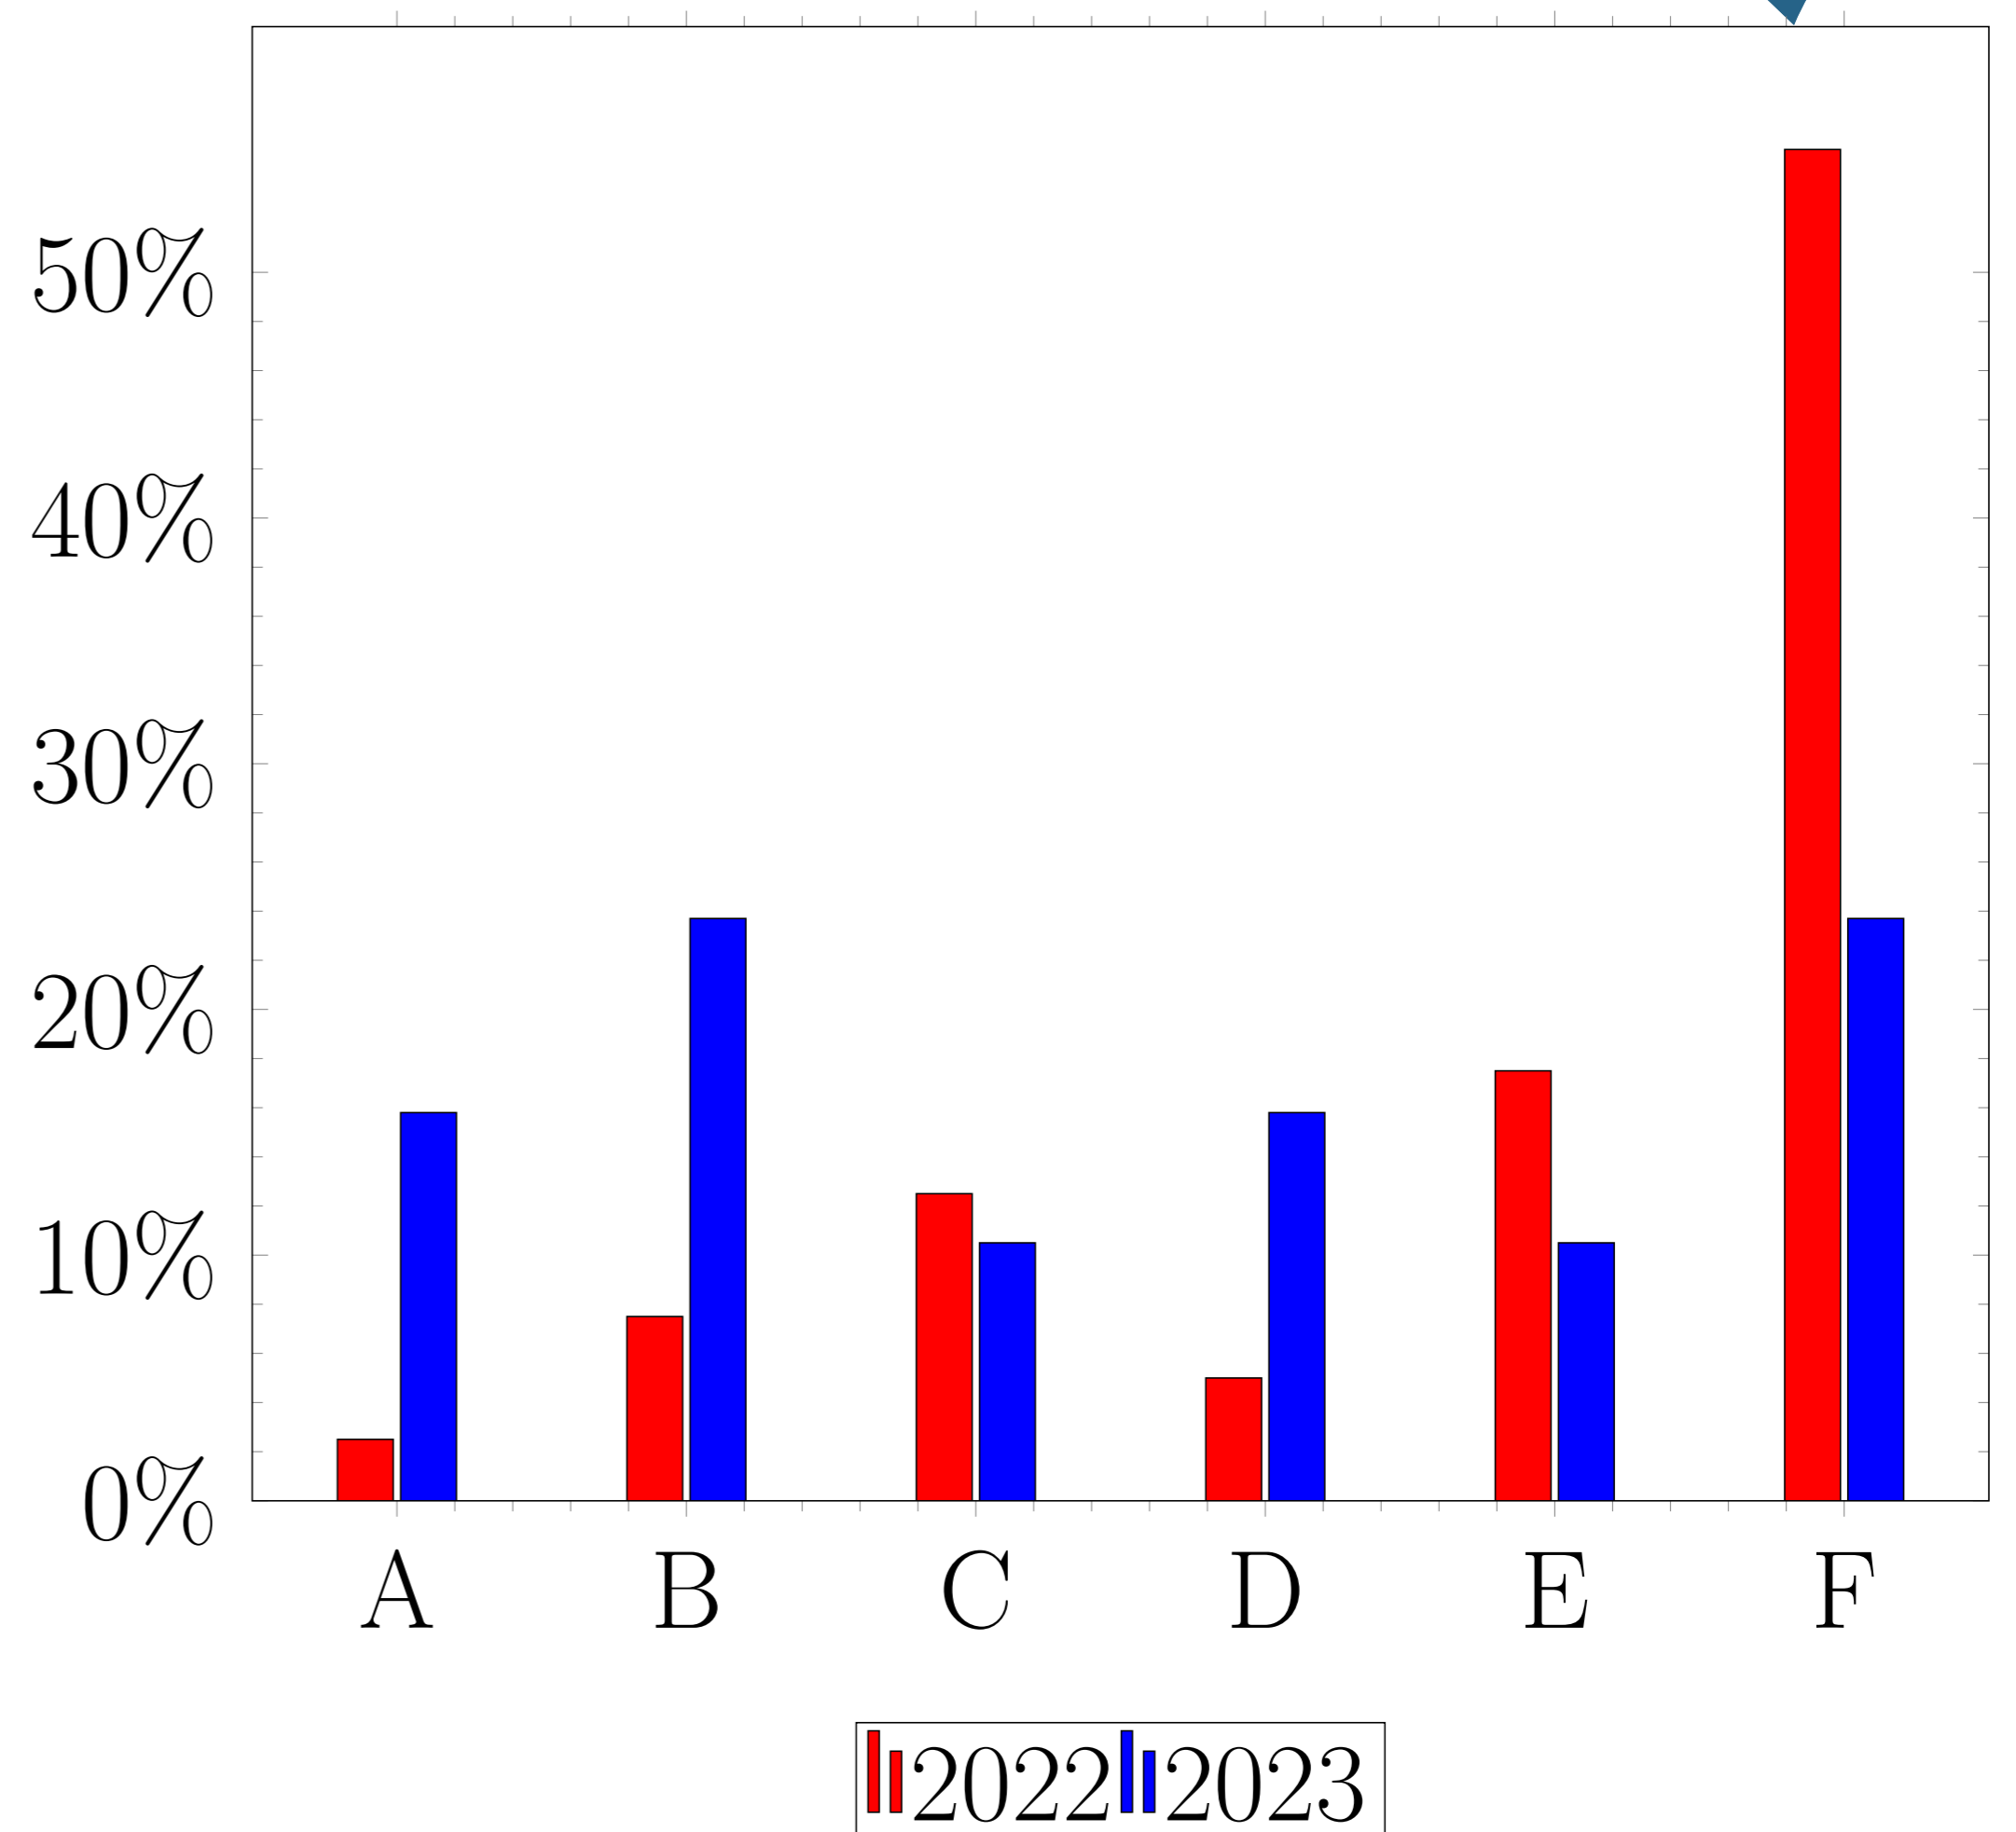

Many of the problems have quite good average scores. The lowest average score were on question 2e and 5c, and these were also the most difficult problems. An overview of average scores are shown below.

Average score per problem

- Question 1: a) 74% b) 52%
- Question 2: a) 68% b) 58% c) 66% d) 58% e) 39%
- Question 3: a) 80% b) 71% c) 59%
- Question 4: a) 57% b) 52%
- Question 5: a) 53% b) 45% c) 15%
